
Software Engineering Project

1. Project Description

This project aims to involve the students in the actual development and implementation of a complete mini software system. A new project may be identified or selected provided that it pertains to certain area of research in computer science.

2. Project Objectives

General Objective: To apply various principles and concepts taught in Software Engineering in designing, developing, and implementing system software.

Specific Objectives: Upon completion of the course, the students should be able to:

- a. Analyze, design, and develop system software by applying the different principles and techniques in software engineering;
- b. Produce the supporting documentation for the created software;
- c. Employ critical/analytical thinking, good reasoning, and good decision making in the development of a project;
- d. Acquire good oral communication skills and presentation skills through a project defense; and
- e. Gain leadership and management skills by working in a team.

3. Types of Project

- ☐ Any System Development (Computerization) Work
 - Transaction Processing Systems
 - ✓ Payroll System
 - ✓ Inventory System
 - ✓ Library System
 - ✓ Enrollment System
 - ✓ Accounting System
 - ✓ Patient Information and Billing System
 - ✓ Others
- ☐ Any Software Development Work
 - Multimedia Systems
 - Tutorial/Mini CAI Software

4. Documentation Outline (See attachment A)

5. Deliverables/Output Schedule

- | | |
|--|----------|
| ☐ Partial Deliverables | Schedule |
| ▪ Project Proposal | Week 4 |
| ▪ Chapters 1 - 2 | Week 5 |
| ▪ Chapters 3 - 4 | Week 6 |
| ▪ Chapters 5 - 7 | Week 7 |
| ▪ Chapter 8 | Week 9 |
| ▪ Process specification and Data specification | Week 10 |
| ▪ Screen/Interface specification | Week 11 |
| ▪ Program/Module specification | Week 11 |
| ▪ Chapters 10 - 11 | Week 12 |
| ☐ Defense Deliverables | Week 13 |
| ▪ Project documentation | |
| ▪ Running system/software | |
| ☐ Defense | Week 14 |
-

☐ Final Documentation

Week 14

6. Grading System

☐ Partial Deliverables	30%
☐ Defense Grade	70%
▪ Documentation (40%)	
▪ Presentation (20%)	
▪ Mini System Software (40%)	
	100%
☐ Subject Grade	
▪ Lecture Grade	60%
▪ Project Grade	40%
	100%

Note:

- The students must form a group composed of a minimum of two (2) and a maximum of three (3) members.
 - All **partial deliverables** are due on or before 5:00 PM of the specified deadline. These should be submitted to the SE instructor.
 - The **defense deliverables** are due on or before 1:00 PM of the specified deadline to be submitted to the SE instructor. Late deliverables submitted between 1:01 PM and 6:00 PM will still be accepted but will be given a 10-point deduction. Deliverables submitted from 6:01 PM onwards will not be accepted and would mean a failing grade for the said project.
 - Non-appearance in the defense venue within the first 20 minutes of the schedule defense will mean that the group will fail in the project.
 - The **running system** must be in executable format (with installer).
 - The **final documentation** is due on or before 6:00 PM of the specified deadline to be submitted to the SE instructor.

Table of Contents

List of Tables

List of Figures

List of Appendices

Acknowledgement

1.0 Introduction

1.1 Background of the Study

1.2 Statement of the Problem

1.3 Objectives of the Study

1.3.1 General Objective

1.3.2 Specific Objective

1.4 Significance of the Study

1.5 Scope and Limitation

2.0 Methodology of the Study (Software Engineering Paradigm)

3.0 Data Gathering Procedures and Outputs (define requirements of software)

4.0 Documentation of the Current System

5.0 Software/Project Estimation

5.1 Schedule of Activities

5.2 Cost Estimation

6.0 Requirements Analysis Specification (model system requirements)

6.1 Process Specification/Modeling

6.2 Data Specification/Modeling

7.0 Software Design Specification

7.1 Process Specification

7.2 Data Specification

7.3 Screen/Interface Specification

7.4 Program/Module Specification

8.0 Software Implementation

8.1 Programming Considerations, Issues, and Tools

8.2 System Requirements Specification

8.2.1 Hardware Requirements

8.2.2 Software Requirements

8.2.3 Human Resource Requirements

8.3 Software Testing

8.3.1 Testing Activities

8.3.2 Test Cases

8.4 Installation Process

9.0 Software Maintenance Plan
